

Shayan Ali

Cybersecurity & IT Infrastructure Engineer

✉ sshayan7252@gmail.com ☎ +971 50 480 9304 📍 Dubai, UAE 🌐 in/shayan89 🔗 sshayan.me

PROFESSIONAL SUMMARY

Recent cybersecurity graduate with hands-on experience in penetration testing, SIEM log analysis, vulnerability assessment, and risk and compliance support through internships, labs, and technical projects. Built practical exposure across both offensive and defensive security, including security monitoring, threat investigation, and risk-focused analysis. Known for being analytical, adaptable, and eager to keep learning, with a real interest in understanding how systems fail and how to secure them better. Available to join immediately.

EDUCATION

Rochester Institute of Technology, BSc Cybersecurity

2022 – 2026
Dubai, UAE

WORK EXPERIENCE

Raen AI, IT Engineer

10/2026 – Present
Sharjah

- Administered IT infrastructure and SaaS platforms, including Google Workspace, Slack, Plane, Hetzner, and Kamatera, managing users, access, configurations, and security controls.
- Deployed and maintained network/security infrastructure, including WireGuard VPNs, server configurations, firewall rules, and Uptime Kuma monitoring.
- Supported IT governance and security operations through digital asset inventory management, security documentation, and infrastructure/access management.

ATSS5E, AI Cybersecurity Intern

12/2025 – 04/2026
Dubai, UAE

- Researched and tested AI-agent penetration testing workflows using Strix, PentestGPT, and Shannon, comparing tool performance in vulnerability discovery and exploitation guidance.

Aspiro, Cybersecurity & Risk Governance Intern

06/2025 – 09/2025
Dubai, UAE

- Supported cybersecurity risk assessments, control reviews, and compliance-related governance activities.

InShield Tech, Technical Internee

05/2025 – 06/2025
Dubai, UAE

- Supported Netskope cloud security operations, including policy monitoring, alert review, and security documentation.

Raen AI, AI Cybersecurity Intern

05/2024 – 08/2024
Dubai, UAE

- Performed LLM application red teaming to identify misuse risks, prompt injection vulnerabilities, and security weaknesses.
- Used Giskard for automated vulnerability scanning, bias detection, and adversarial testing of AI models.

Lattafa, IT Intern

05/2023 – 08/2023
Sharjah, UAE

- Supported IT teams with security documentation, internal controls, access control practices.

CERTIFICATIONS

- Microsoft Certified: Cloud and AI Security Engineer Associate (SC-500)
- EC-Council CEH v13 – In Progress
- ISO/IEC 27001:2022 Lead Auditor – Mastermind
- Google Cybersecurity Professional Certificate

PROJECTS

Security Log Analysis & Monitoring

- Performed log analysis using Splunk and Microsoft Sentinel to identify suspicious patterns, investigate events, and support security monitoring workflows.

AI Risk Assessment for Recruitment System

- Completed an AI governance risk assessment project, identifying key security risks, control gaps, and mitigations.

Malware Exploit Investigation

- Investigated a malware exploit using Kibana, Sguil, and Wireshark to analyze attack traffic and identify exploit behavior.

Offensive Security Labs – Hack The Box and TryHackMe

- Completed penetration testing labs, exploiting vulnerabilities and performing privilege escalation.

SKILLS

Entra ID, Microsoft Purview, Splunk, Microsoft Sentinel, Security Onion, Kibana, Sguil, Wireshark, Netskope, SIEM Monitoring, Alert Triage, Log Analysis, Incident Escalation, IDS/IPS Concepts, Malware Analysis, Digital Forensics, Burp Suite, Metasploit, Nmap, Active Directory, Bloodhound
